

Classification of Goods and Services

Nice Classification

The classification of goods and services is according to the ICGS under the Nice Agreement to which Singapore is a signatory (“Nice Classification”). For the registration of your trade mark, you are required to state the exact class number and appropriate specification according to the Nice Classification.

The class headings of the Nice Classification give general information about the types of goods and services which belong to each class. A specification indicating the class heading does not amount to a claim for all the goods or services in that class. This list is not exhaustive and serves as a quick reference to help you locate the correct class.

More details regarding the Nice Classification are available at [WIPO's website](#).

International Classification of Goods and Services (ICGS) Autochecker

The ICGS Autochecker helps trade mark applicants and agents search for and classify their goods and services by verifying their list against our database of pre-approved items. Currently, there are approximately 98,000 unique entries in our database.

The tool consists of two search functions namely, multi-item search and flexi-search. The multi-item search function allows users to copy-and-paste, type or edit multiple descriptions of goods or services. The tool will automatically split the specification along the semi-colons, and verify whether each of the description is filed in the correct class. The flexi-search function allows user to perform in-depth search of a single-item.

As the ICGS Autochecker may not reflect the most updated descriptions of pre-approved goods and services, users are strongly encouraged to use [IPOS' Classification Database of pre-approved descriptions of goods and services](#) to search for the appropriate descriptions to avoid facing objections against your trade mark application and reduce the processing time.
